Profile

Full Stack Python AI Developer with 2.6+ years of experience designing, developing, and deploying scalable web applications, including large-scale government systems handling millions of records. Proficient in **Python, Django, FastAPI, and Flask**, with strong expertise in **REST API development, database design, performance optimization, Celery, Redis, and microservices-based architecture**. Hands-on experience with **AWS, Docker, and modern frontend technologies** including React. Experienced in applying **Generative AI and LLMs** to real-world applications, including **RAG systems, prompt engineering, and LLM integrations** using OpenAI and Gemini APIs.

Skills

Core Technologies : Python, C

Frontend : HTML, CSS, JavaScript, Bootstrap, AJAX, React

Backend & APIs : Django, Flask, FastAPI, Django REST Framework (DRF), REST API Design

Async Processing & Caching : Celery (Django), Redis

Databases : MySQL, PostgreSQL, SQLite

System Design : Modular Architecture, Microservices-based Architecture, API Design

DevOps & Cloud : AWS (EC2, S3, RDS, Lambda), Docker, Git, GitHub

AI & LLM Technologies: Generative AI, LLM Integration, Prompt Engineering, RAG, LangChain, Gemini API, Claude, Kimi, Google Veo 3.1, Google Flow, Structured Output, Vector Search (FAISS)

Education

Python Full Stack Diploma

Firstbit Solutions, Pune

2022 – 2023

Bachelor of Engineering | 8.23

MET BKC'S Institute of Engineering, Nashik

2018 – 2022

Professional Experience

Python Developer (Full Stack), Mindmatrix Services Private Limited

March 2024 – present

- Owned end-to-end development of key modules, including database design, APIs, and workflow architecture for large-scale government applications.
- Developed scalable REST APIs handling 5K+ daily records integrating with central systems, ensuring high availability and reliability.
- Implemented asynchronous processing using Celery with Redis, improving scalability through background task execution.
- Built modular components following microservices-inspired architecture and integrated AI-driven features to enhance system functionality and user experience.

Projects

AI-Powered Cultural Heritage Video Generation — Museum Kiosk

Tools: Generative AI, Claude, Kimi, Google Flow, Veo 3.1, Omni 1.1 Flash, Prompt Engineering

- Applied Generative AI to transform historical Assamese stories into visual storytelling sequences for an interactive museum kiosk.
- Structured stories into scenes and shots, defining characters, environments, actions, movements, camera directions and visual details for AI generation.
- Leveraged Claude and Kimi for prompt generation and refinement, iterating prompts and evaluating AI outputs to improve video quality and consistency.
- Used Google Flow with Veo 3.1 and Omni 1.1 Flash, along with image/frame references and Ingredients workflows, to generate consistent visual sequences.

DataQueryAI (LLM-powered Natural Language Query Automation System)

Tech Stack: Python, FastAPI, Gemini API, Bootstrap 5, PostgreSQL

link-: <https://dataqueryai.shreyasbhalde.in/> 

- Built an AI-powered NL-to-SQL system to convert natural language queries into structured database queries with user-friendly results.
- Optimized query execution flow, reducing LLM API calls by 30% and improving response performance.
- Implemented validation and control mechanisms to ensure safe and accurate SQL query generation.

State Government Job Portal, Mindmatrix Services Pvt. Ltd

Tech Stack : Django, HTML, CSS, Javascript, Bootstrap, PostgreSQL, Celery ,Django Rest Framework

- Owned end-to-end development of key modules for a large-scale job portal handling **30 lakh+** applicant records with multi-role access.
- Designed and implemented data ingestion pipelines and REST APIs using Celery and Redis, processing **1,500–6,000** records/day for seamless integration with central government systems
- Optimized complex queries and reporting workflows, improving dashboard performance by **90%+** and significantly reducing report generation time.
- Built and enhanced modules for Department, District Exchanges and recruiter workflows, improving application tracking, job posting, and overall system usability.

State Career Counselling Portal, Mindmatrix Services Pvt. Ltd

Tech Stack: Django, HTML, CSS, JavaScript, Bootstrap, PostgreSQL

- Designed and developed core modules for a **multi-user** portal supporting counsellors, applicants, and state department workflows, including **database schema design**.
- Built end-to-end workflows for counsellor onboarding, session management, and scheduling, enabling dynamic configuration of sessions and charges.
- Developed applicant and admin features including session booking, helpdesk management, and MIS dashboards for tracking platform usage and activity.

RAG-based Document Question Answering System

Tech Stack : FastAPI, Gemini API, FAISS (Vector Databases), Sentence Transformers, React

- Built an end-to-end Retrieval-Augmented Generation (RAG) system to enable contextual question answering from uploaded PDF documents.
- Implemented document processing pipeline including text extraction, chunking, embedding generation, and storage in FAISS vector database.
- Designed semantic search and LLM response flow using Gemini API, ensuring accurate, context-based answers with source references (page numbers).

Other Projects:

Tech Stack : Django, MySQL, HTML, CSS, JavaScript, Bootstrap

- **Kalaakshar (Freelance)** – Art platform with e-commerce features for course listings and product purchases.

Link -: <https://kalaakshar.in/> 

- **Recipe Web Application** – User-based recipe management system with authentication and CRUD functionality.

Link -: <https://yummyrecipe.shreyasbhalde.in/> 

- **Food Ordering Web Application** – Basic food ordering system with menu, cart, and order workflows.

Link -: <https://bhaldesfeast.shreyasbhalde.in/> 

Certification

ADVANCE COMPUTER APPLICATIONS(C, Computer Basics, Internet, M.S office 2016) 

AWS Cloud Essentials Knowledge Badge 

Certification In Docker by Simplilearn 

Databricks Academy Accreditation - Generative AI Fundamental
